# 2015 ANNUAL REPORT

# REBUILDING LIVES AFTER TORTURE...

# Our Orgnization

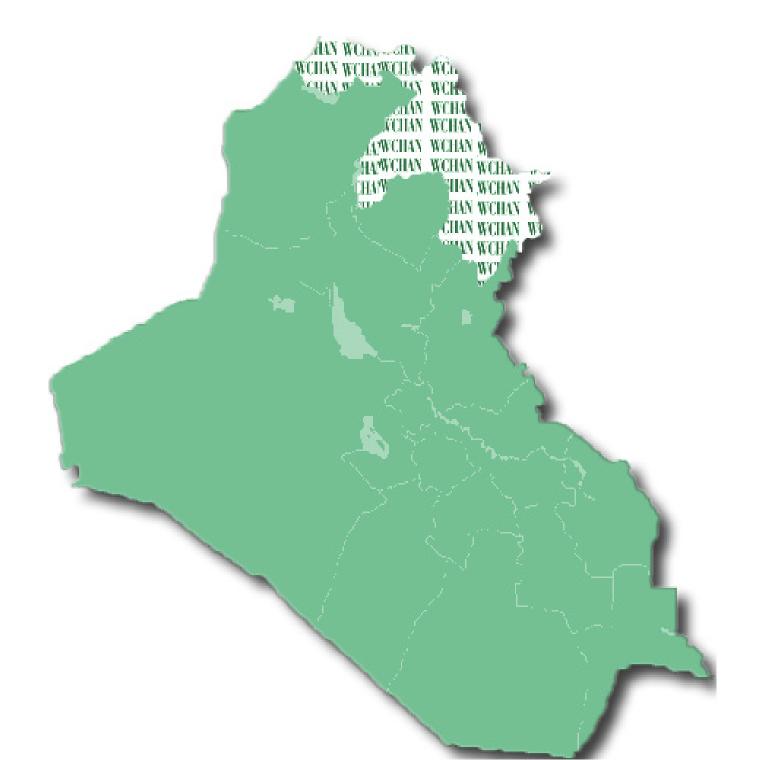

Wchan Organization for Human Rights Violations is a Kurdish-Iraqi independent, non-governmental, and non-profit human rights organization that works to oppose all human rights abuses related to torture, genocide, war, and gender-based violence.

# ORGANIZATIONAL OBJECTIVES

- a. To offer a wide range of rehabilitation services (medical, mental health, case management and social) to survivors of human rights abuses.
- b. To build capacity through training and clinical supervision of other paraprofessionals working with rehabilitation organizations.
- c. To offer legal advocacy in and out of court for survivors and their families to support their efforts in receiveing compensation.
- d. To oppose all human rights violations.
- e. To collect information regarding human rights violations through direct service work, research, observations, and visits to prisons and shelters.
- f. To document human rights violations in a confidential and professional manner.

### Our Location

Wchan Organization's head office is based in Sulaimania and provides services to individuals from throughout the Kurdistan Region, including the Governorates of Sulaimania, Erbil and Duhok. Wchan Organization also accepts cases from other areas in Iraq as needed.

# Board Of Trustees (BoT)

### The BoT consists of three memebers:

• Judge Rzgar Muhammad Amin Head of the Board

Dr. Azad Ali Ismail
 Board Member

Ms. Vian Abdulrahim Abdullah Board Member

# BOARD OF DIRECTORS

The Board of Directors (BoD) consists 2. of seven members. The BoD is responsible for developing and implementing plans; overseeing 4. activities; managing finances; and monitoring and evaluating the programs.

The BoD includes the following 6. Mental Health Supervisor positions:

1. Executive Director

- Mental Health Director
- Finance Manager
- Administrator
- Case Manager
- Mental Health Counselor
- Any other appointee as deemed necessary by the executive director

# OUR PROECTS

The occurrence of female suicide by setting oneself on fire is increasing in the Kurdistan region of Iraq at disturbing rate.

Women who survive suffere from severe burns which require coordinated and

comprehensive physical, psychological, and case management support to restore functioning and reduce the risk of suicide. However, in burn hospitals where hundreds of survivors seek treatment annually, the personnel are not equipped to respond to the needs of survivors of gener based violence. Additionally, interdisciplinary care is not formally implemented in the offices of the Minstry of Health. There is a shortage of staff in the Government hospitals that are trained to address the

Improving care and reducing stigma for women in Iraq who survive gender-based violence and self-immolation

# Partnership with Heartland Alliance International.

psychological needs of women who have attempted suicide. Due to a lack of available social ad mental health services, survivors rarely have access to the support they want and need. This project promotes scomprehensive response services for survivors through the provison of quality clinical care, suicide risk assessments, and traumainformed psychological support.

### **Case management services for IDP** survivors of SGBV in Sulaimania UNHCR governorate Partnership with

This project supports survivors of sexual and gender based violence (SGBV), as well as those at risk, in the governorate of Sulaimania. The survivors and their families recieve direct therapuetic services including psychosocial and psychological services. Referals are made for the survivors to access specialized mental health services from the Trauma Rehabilitation and Training Center of Wchan Organization for Victims of Human Rights Violations, Directorate of Combating Violence Against Women, and legal aid partners. This projet ensure that all services implement confidentiality standards and follow procedures to ensure the full consent of survivors. Activities aimed at preventing SGBV are also offered including psychoeducation seminars for community members and educational sessions to increase awareaness of issues of SGBV for community leaders.

This project empowers Iraq's ethnic and religious minorities to effectively assert their rights. It also promotes their long-term survival during a time of increased ethno-sectarian violence. The project includes mental health and legal aid services. Wchan's seeks to improve access to mental health services and medical care for ethnic and religious minorities with severe impairments due to traumatic stress.

This is accomplished through the provision of direct mental health and case management services at Wchan's Trauma Rehabilitation and Training Center in Sulaimania and training and clinical supervision at three community based organization in Erbil, Duhok, and Kirkuk governorates.

### UNFPA Spell out what UNFPA stands for

Wchan implemented a training project in partnership with UNFPA for three months which involved training social workers in Sulaimania governorate on the case management of survivors of gender based violence and training physicians on the Clinical Management of Rape (CMR).

## United Nations Office of the High Commissioner for Human Rights

United Nations Voluntary Fund for Victims of Torture/Regular Fund/ Project title: Trauma Rehabilitation and Training Center of Sulaimania

Through this project, Wchan provides direct specialized mental health and case management serivce to survivors of torture and their families, as well as, conducts training on trauma, torture, and communication skills for psychologists, social workers, and staff working inside the prisons and detention centers in Kurdistan.

# United Nations Office of the High Commissioner for Human Rights

United Nations Voluntary Fund for Victims of Torture – Emergency Fund/ Project title: Mental Health Services to IDPs and Refugees in Iraqi Kurdistan region

Through this project, Wchan provides:

- Direct mental health and case management services to internally displaced persons (IDPs) and refugees who are survivors of torture
- Psychoeducation sessions for IDPs and refugees on the impact of torture on individuals, families and communities and the need for rehabilitation
- Training on communication skills and basic psychosocial support for IDPs and refugee populations, particularly for persons that have a background in mental health and/or social work to equip them with skills to provide services for their own communities.

# SERVICE PROVISION BY WCHAN ORGANIZATION FOR VICTIMS OF HUMAN RIGHTS VIOLATIONS

Wchan Organization provides comprehensive services including psychosocial support, specialized mental health treatment, and medical treatment, as well as, legal support through an established referal pathway

### Mental health services include:

- 1. Preliminary intake assessment for eligibility purpose (if not eligible, an appropriate referral wil be made)
- 2 Full intake session and short-term interventions such as:
  - a. Psychoeducation and normalization of symptoms
  - b. Family counselling and education
  - c. Relaxation techniques for anxiety and sleep problems
  - d. Safety planning for suicide prevention
- 3. Individual psychotherapeutic interventions using the following evidence-based interventions:
  - a. Cognitive-Behavioural Therapy (CBT)
  - b. Cognitive Processing Therapy (CPT)
  - c. Common Element Treatment Approach (CETA)
  - d. Narrative Exposure Therapy (NET)
- 4. Group interventions
  - a. Group psychotherapy using CPT
  - b. Life skills for substance abuse

### Social services include:

- 1. Transportation assistance
- 2. Assistance accessing public benefits
- 3. Assitance accessing benefit with NGOs, especially for IDP and Refugee populatins

Medical treatment for survivors of torture consists of rehabilitation services for injuries, the

management of physiological effects of traumatic stress, and the psychiatric medication management for PTSD and depression.

### Emergency services are also provided including:

- Crisis management and suicide prevention through individual and/or family crisis counselling and safety planning
- Hospitalization for medical or psychiatric emergencies 2.
- 3. Emergency housing assistance for clients at risk of homelessness
- Supporting family communications (especially for IDPs) 4.

# Medical services:

SOme of this conten repeated from previous page. Also the legal services aet missed because the the title ofmedicl services is so big.

- 1. Psychiatric Services
  - a. Psychiatric evaluation
  - b. Medication management
- 2. Primary healthcare services for managing the physiological effects of traumatic stress such as high blood pressure
- 3. Specialist services if needed clients are referred to hospitals or clinics for services not provided by the organization. These include
  - a. Internal medicine and chronic disease management
  - b. OB/GYN
  - c. Surgery
  - d. Orthopaedics
  - e. Neurology
  - f. Physical therapy
  - g. Others as indicated

Legal services are provided throughthe referral of cases to two national legal NGOs - Democracy and Human Rights Development Center (DHRD) and Civil Development Organization (CDO).

# CLIENT-FOCUSED COMMUNITY- BASED HOLISTIC REHABILITATION

Survivors work with staff and volunteers to identify their needs so that they can begin to overcome the obstacles to healing. TRTC provides a safe and supportive environment where the survivor can break the cycle of fear and isolation and reconnect with a caring community.

# Trauma Rehabilitation and Training Center (TRTC)

The TRTC provides comprehensive services for survivors of trauma and training for mental health workers. In October 2011, the TRTC became an independent organization under the umbrella of a newly-formed local NGO, Wchan Organization for Victims of Human Rights Violations. TRTC is the main program of the Wchan Organization and works to rehabilitate survivors of human rights abuses through the provision of services including case management, psychiatric, and psychological assistance.

TRTC opened its doors in 2007 to help survivors of torture and other severe human rights abuses including war truama, like the Anfal genocide, gender-based violence, domestic violence, and self-immolation. TRTC seeks to empower these populations with the skills to overcome the trauma they experienced.

### Prevention activities:

Training was provided for 113 professions over 8 sessions equaling a total of 26 days. The participants included the following:

- 24 Social workers and psychologists working in prisons
- 59 social workers and case managers from NGOS that work with internally displaced persons (IDPs)
- 30 community based social workers, psychologists, general practitioners

More than 95 Seminars were provided for 2491members including 2143 IDPs, 191 refugees, and 157 prisoners

# OUR RESULTS

The TRTC assists approximately 250 survivors of torture each year. The following case is just one example of the many success stories:

A 47-year-old Iraqi Kurdish man was referred to the TRTC by the Internal Prisoners' Association of Kurdistan. When the client came to the TRTC on October 18, 2012 he stated that he had experienced several traumatic events including torture. Due to his political affiliation, he had been jailed and tortured for days on several different occasions. He experienced both psychological nd physical torture including physical beatings, forced exposure to hot weather, isolation, mock execution, and being falsely informed that his wife had been killed. These traumatic expereinces left him with severe psychological and physical symptoms. The client complained of generalized body pain, continuous headaches, anger, sadness, sleeplessness, feelings of inferiority, social isolation, feelings of loneliness, problems in decision making, and suicidal thougts.

This man participated in an initial assessment with a mental health counselor at the TRTC which invovles assessing for post-traumatic stress disorder (PTSD), anxiety, and Major Depressive Disorder (MDD). The initial scores from the assessment showed that he had symptoms conistent with PTSD and MDD.

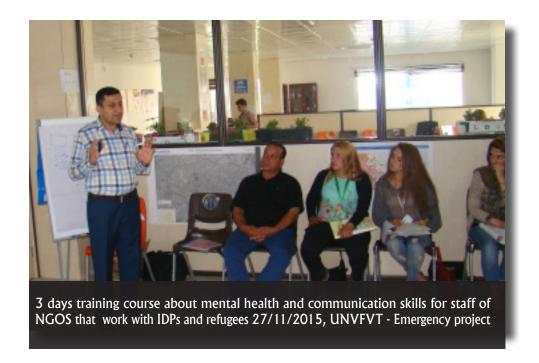

The clinical team at the TRTC developed an indivdualized four-month treatment plan for this man which included mental health treatment sessions, a safety plan to manage suicide risk, and psychiatric sessions and medications. After the period of treatment, he no longer presented with smptoms of PTSD or MDD. He also reported that his symptoms had improved dramatically.

He stated: "I compare myself to a wild injured animal that couldn't see any assistance and had no hope of getting help, but all of a sudden a helicopter came and provided medical aid, food, and cured my wounds. The helicopter I am describing is the Trauma Rehabilitation and Training Center."

The case was closed successfully on February 10, 2013.

### Cultural and Multidisciplinary

Wchan Organization for Victims of Human Rights Violations individualizes services for people from different ethnic and religious communities throughout Iraq. The center offers a comprehensive array of services to help survivors rebuild their lives.

### TRAINING

WCHAN's qualified staff regularly run training courses in collaboration with the Ministries

and the Universities. The training courese are often for psychiatric residents, physicians, nurses, medical staff, psychologists and social workers.

WCHAN also trains new staff and students on psychosocial skills in order to equip them with the sklls to work effectively with survivors of torture and other trauma.

Training course for social workers in Sulaimania on "Case Management of Rape"

3 days training course about mental health and mental illness, communication skills, stress, trauma and PTSD, and suicide for social workers and psychologists that work in the adult, women, and juvenile reformatories - Slaimani February 15 – 17,2015. UNVFVT Project.
